## Profile

As a 10-year-old, I created my first website and had fun with HTML and CSS. Since then, I have always had an interest in coding. I couldn't keep my hands off software development, and now I'm using my psychology background as a developer.

With a psychological background and my technical knowledge, I strive to understand the users' needs, thus creating user-friendly solutions. I focus on building good relationships with colleagues, business partners and customers, and I contribute to creating a positive atmosphere in the workplace.
